## Education

**National Yang Ming Chiao Tung University (National Chiao Tung University)**

Hsinchu, Taiwan

**Bachelor of Science in Computer Science**

Sep. 2019 - Jun. 2023

- GPA: Overall **4.1/4.3**, Major **4.16/4.3**
- Academic Achievement Award (Top 5% of the class)

## Work Experience

**Appier Inc.**

Taipei, Taiwan

Software Engineer Intern

Jul. 2023 - Present

- Built a Pub/Sub-based notification service handling 1000+ messages daily, with email integration and customizable formatting
- Boosted system observability via integration of Elastic APM and OpenTelemetry for end-to-end performance monitoring
- Employed multiple design patterns to migrate the existing monolithic system into 3 scalable, modular microservices

**Shopee Pte. Ltd.**

Taipei, Taiwan

Backend Engineer Intern

Oct. 2022 - Mar. 2023

- Implemented a logging system using Elastic stack, achieving a 95% decrease in manual log analysis efforts
- Refactored the backend codebase with Object Relational Mapping (ORM), reducing the use of raw SQL queries by 70%
- Designed and managed 3 new databases to support the ongoing projects and enable smooth project delivery

**Kapito Inc.**

Hsinchu, Taiwan

Software Engineer Intern

Jul. 2022 - Aug. 2022

- Applied role-based access control to the current system, reducing 50% of API endpoints in the backend
- Constructed automated CI/CD pipelines using Ansible and Drone CI, speeding up application setup 3x times faster
- Established a Kubernetes cluster to orchestrate the deployment and management of NVIDIA Triton Inference Server

## Research Experience

**Mobile and Ubiquitous Interaction Lab**

Hsinchu, Taiwan

Research Assistant

Jul. 2021 - Sep. 2023

- Worked on Human-Computer Interaction, especially focusing on mobile attention and notification
- Conducted 2 studies on AI-enhanced notification management to optimize mobile interactions and minimize disruptions
- Developed intelligent notification systems that improve smartphone users' experience of notifications

## Projects

**NotiSummary**

Android | Kotlin | Jetpack Compose | Material Design 3 | Room Database | Firebase

- Crafted an AI-powered application that utilizes large language models to present smartphone notifications in a summary form
- Achieved user engagement with 150+ downloads on the Google Play Store within a few months after release

**LinkLite**

TypeScript | Node.js | Express.js | MongoDB | Redis | Docker | Nginx | Github Action | Jest

- Developed RESTful APIs that offer URL shortening services, integrated with CI/CD pipelines for automated testing and deployment
- Implemented a caching mechanism using Redis to expedite URL lookups and reduce database overhead
