Education

University of California, San Diego — *La Jolla, CA*

Master of Science in Computer Science — *Sep. 2024 - Dec. 2025*

- GPA: **3.97/4.0**
- Coursework: Database Systems, Network Systems, Machine Learning, Computer Architecture

National Yang Ming Chiao Tung University — *Hsinchu, Taiwan*

Bachelor of Science in Computer Science — *Sep. 2019 - Jun. 2023*

- GPA: **4.1/4.3**; Academic Achievement Award (Top 5% of the class)
- Coursework: Operating Systems, Distributed Systems, Cloud Computing, Parallel Computing, Networking, Computer Security

Work Experience

LinkedIn, Software Engineer (Systems Infrastructure) — *Mountain View, CA*

Java | Scala | Apache Iceberg | Apache Spark | Trino | HDFS | Airflow | Kubernetes — *Feb. 2026 - Present*

- Developed OpenHouse, an open-source control plane for managing tables in large-scale data lakehouses

LinkedIn, Systems & Infrastructure Engineering Intern — *Mountain View, CA*

Python | Apache Iceberg | Apache Spark | Apache DataFusion | Apache Arrow | Flyte | HDFS — *Jun. 2025 - Sep. 2025*

- Built a library integrating Apache Iceberg, Arrow, and HDFS to stream data from data lakehouses into ML training workflows
- Reduced over 40000 TB of memory usage per week by replacing legacy data loaders, saving $3 million in hardware costs
- Partnered with the ML team to plug the new library into PyTorch and TensorFlow pipelines within Flyte for distributed training

Appier, Software Engineer Intern — *Taipei, Taiwan*

Python | FastAPI | Flask | TypeScript | React.js | GraphQL | Docker | Jenkins | Elastic Stack | GCP | AWS — *Jul. 2023 - Jun. 2024*

- Built a scalable and fault-tolerant notification microservice handling 10000+ messages daily based on the Pub/Sub model
- Developed a dashboard with 5 engineers for over 400 employees to track and manage the company's advertising business
- Boosted overall system observability by integrating Elastic APM and OpenTelemetry for end-to-end performance monitoring
- Created Jenkins pipelines for 10+ developers to set up dev environments and databases, reducing human intervention by 90%
- Optimized frontend performance by utilizing virtualized rendering for large-scale tabular data, decreasing load times by 50%

Shopee, Backend Engineer Intern — *Taipei, Taiwan*

Python | FastAPI | SQL | MySQL | Docker | Elastic Stack — *Oct. 2022 - Mar. 2023*

- Deployed a logging system with Elastic stack to streamline log analysis across multiple servers, cutting manual effort by 95%
- Refactored the backend codebase with Object Relational Mapping (ORM), reducing the use of raw SQL queries by 70%
- Collaborated with a team of 6 to develop a Business Intelligence platform, benefiting over 100 users across the organization

Kapito, Software Engineer Intern — *Hsinchu, Taiwan*

Python | FastAPI | PostgreSQL | Docker | Kubernetes | Drone CI | Ansible — *Jul. 2022 - Aug. 2022*

- Reduced 50% of API endpoints in the backend by applying role-based access control in the current system
- Constructed automated CI/CD pipelines using Ansible and Drone CI, speeding up application setup 3x times faster
- Established a Kubernetes cluster to orchestrate the deployment and management of NVIDIA Triton Inference Server

Agentic Intelligence for Mobile Engagement and EXperience Lab, Research Assistant — *Hsinchu, Taiwan*

National Yang Ming Chiao Tung University — *Jul. 2021 - Sep. 2023*

- Conducted research in Human-Computer Interaction (HCI) with a focus on mobile systems and mobile notification
- Led a team of 3 people in developing intelligent notification agents and published 5 papers on mobile notification management

Projects

NotiSummary

Kotlin | Android SDK | Android Jetpack | Jetpack Compose | Material Design 3 | Room | Firebase

- Crafted an AI-powered application that utilizes large language models to present smartphone notifications in a summary form
- Achieved increased user engagement with 500+ downloads on the Google Play Store within a few months after release

Skills

Languages	Python, Java, Scala, C, C++, Go, JavaScript, TypeScript, Shell Script, SQL
Frameworks	GraphQL, gRPC, Node.js, FastAPI, Flask, React.js, Next.js
Big Data	Apache Iceberg, Apache Spark, Apache DataFusion, Apache Arrow, Trino, HDFS
Databases	MySQL, PostgreSQL, SQLite, MongoDB, Firebase, Redis
DevOps	Docker, Kubernetes, Jenkins, Ansible, Nginx, Elastic Stack (ELK), Google Cloud, Amazon Web Services, Azure
